

## INSTALLATION INFORMATION

Fitting to St Michel Dante mirror cabinet

- 1 - Decide on height of mirror cabinet, suggest 1940mm above finished floor level.

- Height should be determined based on how you want cabinetry to look and desired height for individual.

2 - Electric cable should exit 50 mm below top of mirror and on centre line of cabinet.

3 - Attach Aria light to top of mirror cabinet.

4 - Fit standard white junction box inside mirror cabinet and connect wiring. Light fitting must be earthed as per NZ wiring regulations.
